SUMMARY

UX/UI Designer with over five years of experience in the field. I'm passionate about creating designs that solve complex problems and make users happy. My skills include experience design, user journey mapping, usability testing, design thinking, wireframing & UI prototyping, interaction design, collaboration, UX research, user research, web design, and mobile app design.

I'm based in Yerevan, Armenia, but I'm always looking for new challenges and opportunities to work with people from all over the world. I'm particularly excited about using AI tools such as ChatGPT, Midjourney, and notion ai to create exceptional user experiences. By leveraging these tools, I can design products that are both beautiful and functional, while also meeting the needs of both users and business goals.

When I'm not designing, you can usually find me reading about the latest design trends, learning new skills, or working on personal projects. I believe that continuous learning and experimentation are essential to staying at the top of my game as a designer.

Overall, I'm a collaborative and detail-oriented designer who is committed to creating usercentered designs that exceed expectations. If you're looking for a designer who can use AI tools to create exceptional user experiences, I'd love to chat and see how we can work together

WORK EXPERIENCE

ANUNA LLC, Yerevan

Product Designer, Dec 2025 - Present

- Conceptualize and execute end-to-end design strategies that harmonize user requirements with core business objectives.
- Translate complex ideas into high-fidelity interactive prototypes and visual assets to validate product architecture prior to engineering.
- Facilitate cross-functional synergy by partnering with engineering and product leads to streamline the handoff and implementation process.
- Leverage qualitative and quantitative insights—including user interviews and competitive analysis—to steer the product roadmap.
- Drive product evolution through a rigorous cycle of testing and data-driven refinements to maximize engagement and resolve friction points.

Freelance Projects

Product Designer, May 2025 - Dec 2025

- **BalVoi** – Designing an AI-powered news platform focused on debiasing articles using a variety of large language models and a custom-trained AI. Responsible for UX strategy, landing page design, and visualizing AI logic for user trust.
- **XYGO** – Creating the interface and NFT structure for a Web3 lottery and marketplace. Designing a gamified experience that combines blockchain mechanics, financial market APIs (NASDAQ/NYSE), and collectible NFT visuals.
- **BookBro** – Developing a mobile app and Telegram mini app for booking sports venues. Designing intuitive booking flows, vendor dashboards, and real-time availability features.

Duck Master, Russia

Creative Director, Sep 2024 - May 2025

- Develop intuitive, user-focused design solutions for products, ensuring functionality, usability, and aesthetic appeal align with both business goals and user needs.
- Create wireframes, prototypes, and mockups to communicate design concepts and test product functionality before development.
- Work closely with product managers, developers, and other stakeholders to ensure seamless communication and alignment throughout the product development process.
- Gather and analyze user feedback, perform usability testing, and conduct market research to inform and improve design decisions.
- Continuously iterate on product designs based on user feedback, analytics, and performance data to enhance the product experience and solve problems as they arise.

AI Artist, Jul 2024 - May 2025

- Design and produce visually compelling graphics that align with the product's brand and style, utilizing AI tools and algorithms to enhance creativity and efficiency.
- Develop user-centered text content using AI, ensuring that it is engaging, clear, and aligned with the product's tone and user experience goals.
- Work with development teams to integrate AI tools into the design workflow, optimizing them for better performance and ensuring they align with the product's design standards.
- Continuously refine AI-generated content based on user feedback and data analysis, ensuring the final product meets user needs and enhances the overall user experience.
- Collaborate with UX/UI designers, product managers, and developers to ensure AI-generated content is consistent, relevant, and supports the product's goals and user experience.

Ineed Inc, Armenia

Product Designer, May 2022 - May 2024

- Played a key role in shaping the user experience and interface design for both the mobile app and landing page.
- Created intuitive, user-friendly interfaces to enhance the user journey and ensure seamless interaction with app features such as emergency support and real-time updates.
- Carefully designed the landing page to effectively communicate Ineed's value proposition, attract potential users, and establish a cohesive brand perception.
- Aimed to make Ineed's services accessible, efficient, and visually appealing, ultimately increasing user engagement and satisfaction.
- Produced high-quality graphic content, including icons, buttons, and illustrations, to enhance the visual appeal and functionality of the app and website.
- Aimed to make Ineed's services accessible, efficient, and visually appealing, ultimately increasing user engagement and satisfaction.
- Produced high-quality graphic content, including icons, buttons, and illustrations, to enhance the visual appeal and functionality of the app and website.
- Conducted user research and usability testing to gather feedback and refine designs, ensuring they meet user needs and preferences.
- Collaborated with developers to ensure the successful implementation of design elements and maintain consistency across all digital platforms.

TIRSoft LLC, Armenia

UX/UI Designer, Oct 2020 – May 2024

- Gathering and evaluating user requirements, in collaboration with product managers and engineers.
- Illustrate design ideas using storyboards, process flows and sitemaps.
- Develop UI mockups and prototypes that clearly illustrate how sites function and look like.
- Identify and troubleshoot UX problems (e.g. responsiveness).
- Adhere to style standards on fonts, colors and images.
- Prepare and present rough drafts to internal teams and key stakeholders.

Graphic Designer, Oct 2020 – May 2021

- Create designs, concepts, and sample layouts based on knowledge of layout principles and esthetic design concepts.
- Determine size and arrangement of illustrative material and copy, and select style and size of type.
- Confer with clients to discuss and determine layout design.

HARD SKILLS

- Experience Design
- Usability Testing
- Design Thinking
- Wireframing and UI Prototyping
- Interaction Design
- User Journey Mapping
- User-Centered Design
- Problem Solving
- Communication
- Adobe Creative Suite
- Animation
- Motion Design
- Information Architecture
- Collaboration
- UX Research
- User Research
- Web Design
- Mobile Design
- Visual Design
- Analytical Skills
- Software as a Service
- Responsive Web Design

SOFT SKILLS

- Cross-Functional Collaboration
- Adaptability
- Visual Communication
- Time Management
- User Advocacy
- Active Listening
- Empathy
- Constructive Feedback
